OBJECTIVE

Aspiring Android Developer with strong knowledge of Java, Android Studio, XML, MVVM architecture, Firebase, and REST APIs. Experienced in developing Android applications and integrating AI-based features to enhance user experience. Seeking an opportunity to contribute to a dynamic development team while expanding my skills in Android application development and software engineering.

EDUCATION

- **B.Tech, Computer Science & Engineering (AI)** - GIFT Autonomous, Bhubaneswar | CGPA: 8.95 | Ongoing
- Intermediate (PCMB) — Odisha Adarsha Vidyalaya, Kavisuryanagar | CBSE | 74% | 2023
- Matriculation — Odisha Adarsha Vidyalaya, Kavisuryanagar | CBSE | 84% | 2021

EXPERIENCE

Freelance Android Developer | E - Ashram | 6 Months

- Developed the He Prabhu Android application using Java/Kotlin, Android Studio, XML, MVVM, Cloud Firestore, and Firebase Storage.
- Delivered a feature-rich application with devotional content, audio streaming, e-books, and multilingual support.

TECHNICAL SKILLS

- Programming Languages: Java, Kotlin, Python, C
- Android Development: Android Studio, XML, MVVM Architecture
- Backend: Firebase (Authentication, Firestore, Storage),
- API Integration: Ktor, REST APIs
- Database: Firebase Firestore, SQLite
- AI/ML: NumPy, Pandas, Scikit-learn, OpenCV, TensorFlow Lite
- Tools & Practices: Git, GitHub, Android Studio, Postman, DSA, OOP

PROJECTS

1. He Prabhu – Spiritual Android Application

- Developed an Android application using Java, Android Studio, XML, MVVM, Cloud Firestore, and Firebase Storage.
- Added features such as devotional content, bhajan audio streaming, e-books, multilingual support, and social media links.
- Used Cloud Firestore to manage app content and Firebase Storage to store and retrieve audio and media files.

2. RupeRadar – Smart Expense Tracker

- Developed an Android expense tracking application using Java, Android Studio, XML, MVVM, Cloud Firestore, and Firebase Storage.
- Added features such as income and expense tracking, transaction history, budget monitoring, and expense categorization.
- Used **Cloud Firestore** to store expense data and **Firebase Storage** to manage application files.

HOBIES AND INTERESTS

- Robotics and Drone Technology Exploration
